

MYE 610

Evaporable lubricant

Description

Colourless Vanishing fluid made up of hydrocarbons reinforced with extreme-pressure, anti-wear additives as well as smoothening agents. Guaranteed chlorine-free, sulphur-free and free of animal fat. Imperceptible dry film, practically free of sticky residue and white traces. Can be bonded, welded, and painted.

Applications

For cold deforming of all metals of slight thickness. For all profiling, cutting, stamping, folding, cambering, and stamping operations on all types of metals (ferrous metals, stainless and coated steels, cuprous, bronze, brass, aluminium, and its alloys).

Technical data

Flash point: 62°C
